- + 5,000 partner companies
- + More than 23,000 members of the EM Normandie Alumni association

The MSc® International Logistics and Port Management aims to equip students with skills in all roles linked to the overall management of logistics flows, to organising international transport and to managing transport hub facilities such as port terminals.

Our teaching approach integrates theoretical modules with multiple implementations situations (serious games, business challenges, field visits,...) which prepare students to make strategic decisions as a team, considering the constraints that may impact performance organisation. This dynamic programme allows students to appreciate the role of technology and emerging innovations within the logistics field.

The MSc International Logistics and Port Management has been developed to provide knowledge and competence in logistics management and transportation processes. The teaching approach integrates a Business Case Challenge, a professional escape game and other simulations tenders based on digital tools making it possible to consider both economic and ecological aspects in a region which is home to the first port of France and which has a recognized international recognition.

NICOLAS GERK
ACADEMIC DIRECTOR
